

Participants with locomotor-capacity source data
N = 535

Valid baseline fear-of-falling status
n = 472

Fear of falling present, n = 328
Fear of falling absent, n = 144

Baseline-adjusted ANCOVA analysis
Participants included in the baseline-adjusted ANCOVA analysis
n = 230

Repeated-measures mixed-effects analysis
Unique participants included in the repeated-measures mixed-effects analysis
n = 400

Fear of falling present, n = 161
Fear of falling absent, n = 69

Eligibility criteria for the baseline-adjusted analysis:
complete baseline and 12-month locomotor-capacity scores
and complete required covariate data

Fear of falling present, n = 276
Fear of falling absent, n = 124

Eligible observations included
n = 630

Eligibility criteria for the repeated-measures analysis:
at least one eligible locomotor-capacity observation
and complete required covariate data
