

Participants with locomotor-capacity source data
N = 535

Valid baseline fear-of-falling status
n = 472

Fear of falling present, n = 328
Fear of falling absent, n = 144

Baseline-adjusted 12-month analysis
Participants in locked ANCOVA model frame
n = 230

Repeated-measures analysis
Unique participants in locked mixed-effects model frame
n = 400

Fear of falling present, n = 161
Fear of falling absent, n = 69

Required for WIDE branch:
complete baseline and 12-month locomotor-capacity scores
and required model covariates

Fear of falling present, n = 276
Fear of falling absent, n = 124

Repeated observations included
n = 630

Required for LONG branch:
eligible repeated locomotor-capacity observations
and required model covariates
